WHEREAS, Assignor is the owner of certain Patents (as defined below);

WHEREAS, Assignee is desirous of acquiring the Patents;

WHEREAS, Assignor and Assignee are parties to that certain Asset Purchase Agreement, dated as of May 3, 2002 (the "Purchase Agreement"); and

WHEREAS, Assignee and Assignor now desire to carry out the intent and purpose of the Purchase Agreement by the execution and delivery to Assignee of this instrument evidencing the sale, transfer and assignment to Assignee of all right, title and interest in, to and under the Patents.

Assignor hereby irrevocably sells, assigns, conveys, transfers and sets over unto Assignee, its successors, legal representatives and assigns, all right, title and interest in, to and under the Patents, the same to be held and enjoyed by Assignee for its own use and benefit, and for the use and benefit of its successors, assigns or other legal representatives, fully and entirely as if the same would have been held and enjoyed by Assignor if this Assignment had not been made. As used in this Assignment, "Patents" shall mean all patents and patent applications of any kind, any inventions covered thereby, all patent rights and rights of priority, all patent disclosures, improvements and all statutory invention registrations, including without limitation (a) any United States and foreign rights in patents, patent applications, provisional patents and applications, rights of priority and inventions covered thereby, and all continuing applications, reissues, divisions, continuations, continuations in part, extensions, renewals and reexaminations of any of the foregoing in the United States and throughout the world to the full end of the term or terms for which any Letters Patent(s) based on any of the foregoing issue, including all claims, if any, that may have arisen for infringement prior to the date of this Assignment, and all patents and applications set forth in Schedule A attached hereto; (b) any licenses and other agreements providing Assignor or a third party with the right to use any item of the type referred to in clause (a) (to the extent this Assignment is not in conflict with any provision of same), including the right to sue for breach or enforcement of any such licenses or other agreements, subject, in each case, to the terms of such licenses and other agreements; and (c) any proceeds of any item of the type referred to in clauses (a) and (b), including license fees, royalty payments and the right to sue third parties for past, present or future infringements of same and to collect all proceeds of infringement suits and judgments in respect thereof for Assignee's own use or for the use of its successors, assigns or other legal representatives.

2. Recordation. If Assignee elects to record this Assignment with the U.S. Patent & Trademark Office (or any equivalent State agency) or any like office of any country or countries foreign to the United States, Assignee shall bear all costs and fees associated with such recording. Assignor hereby authorizes and requests the Commissioner of Patents and Trademarks of the United States, and any like official of any State or any country or countries foreign to the United States whose duty it is to issue patents on applications as aforesaid, to transfer all such Patents to Assignee as owner of the entire right, title and interest therein or otherwise as Assignee may direct, and to issue to Assignee, its successors, legal representatives and assigns, all patents which may issue with respect to any such applications, in accordance with the terms of this instrument.
